# RUSSO-GERMAN CONFLICT

MOSCOW WAS RAIDED FOR THE FIRST TIME ON MONDAY NIGHT BY GER-MAN PLANES SINCE THE START OF THE RUSSO-GERMAN WAR. More than 200 Nazi machines attempted to raid the city but only isolated planes reached the city.

While the Germans claim that heavy damage was inflicted, a report from a neutral observer in the Russian capital states that there was very little damage to Moscow when he toured the city yeste day morning, says Reuter.

Yesterday morning's communique from the Soviet Information Bureau states: "During last night, stubborn fighting continued in the directions of Pskov, Polotsk. Nevel, Smolensk and Novograd-Volynsk.

"In the other directions and sectors of the front, no large-scale operations took place.

## Blitzkrieg Behind Schedule Despite Extravagant Claims

MOSCOW, July 22 (Reuter) — "The Germans; despite their claims that the Red Army and Air Force have been annihilated, have already long passed the assigned dates for their entry into Kiev. Leningrad and Moscow," declared M. Lozovsky, Vice-Commissar for Foreign Affairs on Monday.

The real explanation for the Nazi delay was provided in an order signed by Major-General Nehring, commanding the 18th German tank division, Lozovsky added. This order found inside a captured tank, says: "It is obvious that our losses in equipment, arms and machines have been unusually great and despite a successful advance they greatly exceed the captured trophies. Continuation of this situation is intolerable in the longrun for we shall go on winning victories to our own perdition."

## QUARREL BETWEEN INDIANS

What was described by Mr. M. J. ## RESTRICTIONS MAY STIMULATE FOOD RAMP: GOVT. MUST ACT

(TRIBUNE STAFF REPORTER)

Government's decision to restrict, or prohibit the import of certain "unessential" goods has brought with it a train of mized criticisms.

Empire-made products-like wines, ciders, beer, ale, liqueurs. boots, shoes, and other "lines"—are almost taboo.

The question is being asked among circles concerned, how this restriction on imports from other parts of the British Empire, where trade must go on to help "allout" war effort, can help stimulate of these countries where they come from

Already it is well-known, Government's price control of essential foodstuffs, like vegetables, pork and such-like daily foods, is not water-tight.

Let us take a tour of the marlife blood of the commerce kets.....Into heaps of vegetables. potatoes, tomatoes, cucumbers, fruits and such like, I found sticks Domestically, housewives and stuck in, bearing the Government's

But the vegetables are not sold at that price. There is always a difference of a few cents. The dealers explain: "Those marked prices are our purchase prices!" What can the local public do?

No amount of bargaining will induce the sellers to part with their wares at the control prices. Big hoteliers and restauranters

in town declare they expected the control measure. "Anything to beat little Adolf." they said. But the general public feel a little apprehension. They fear that until more stringent measures are adopted by the local

authorities to check what is undoubtedly a food ramp, these further restrictions on higher prices and what the government calls "unessential" foods will result in a bigger demand for the cheaper foodstuffs.

Knowing what the sellers of these foods are, they fear that unless Government puts its foot down; cost of living will jump up.
